

Adding your device to the app

Video Example

1. Open the app
2. When prompted (Only relevant for new installs)
 - Decline Location Tracking
 - Accept Notifications (both normal and critical) if you wish to receive notifications
 - Accept the terms
3. Look for a "Skip" button on the top right (Only relevant for new installs)
 - Click "Skip when prompted"
4. Click the "+" icon on the top right
5. Click "Manual Adding" from the drop-down
 - Select OK if prompted
6. Default values to enter on Add Device screen
 - See default values chart
7. Click the save icon on the top right
 - If everything is entered properly, you should see the camera no. change from 1 to a different number
